

Data is only meaningful if it's easy to interpret.

Our new Reporting and Analysis Suite makes it easy to know where you stand and provides a clear path to action.

mCLASS® was built from the ground up to deliver a greater return on assessment. We started by considering everything you'd want to do with your data and worked back from there. Intuitive visuals, interactive charts and graphs, one-click featured and customized reports, and effectiveness summaries help you uncover patterns, allocate resources, make informed decisions, and then collaborate with one-click sharing capabilities.

Your Data, Your Way

- **Visual design that tells a clear story**, whether you're a data analysis guru or just learning the ropes.
- **Want to know more? Just click it.** Dynamic, interactive graphics make it easy to drill down or up from student- to district-level analysis.

POPULATION

TIME

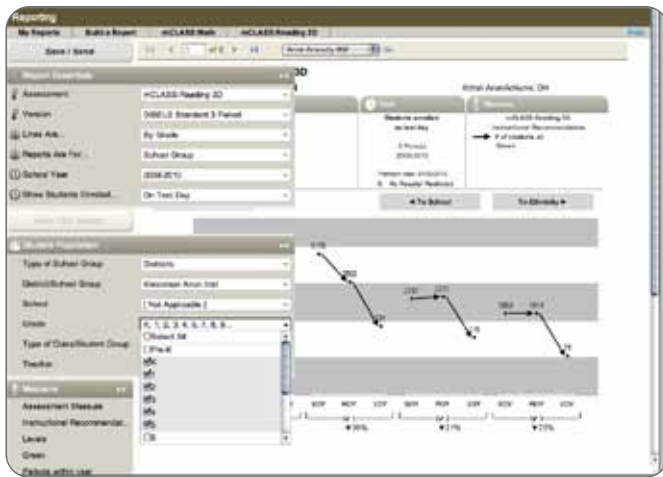

MEASURE

Simple Icons

- Like a "Favorites" menu for your reports, the most common reports are collected in one location for convenience.
- **Collaborate as never before** with one-click ease to reinforce priorities and share insights.

- **Nobody is better at letting you have it your way.** From state-wide aggregate to individual results, robust parameterization criteria allow you to cross-reference and analyze data points in nearly limitless ways.

- **See what's working, and what's not,** as you evaluate trends and effectiveness of instruction over time in your search for opportunities to increase performance.

Your Assessments Math Reading

- **Connect the dots by bringing all your assessment data together,** from all of your mCLASS data to other assessments, including high-stakes state test results.

Look for these powerful enhancements in the Reports section of mCLASS®:Home. Login to watch a free video tutorial and learn how to put reporting to work for you.
